

This architectural elevation drawing illustrates a modern building facade integrated into a historic urban context. The central building features a series of horizontal, light-colored slats or louvers that create a rhythmic pattern across its upper levels. A prominent vertical glass section is located in the center of the facade. To the left, a historic building with arched windows and a red-tiled roof is visible. To the right, a tall, slender church spire rises above the surrounding buildings. The drawing includes technical annotations such as dimensions (e.g., 11.50 - 0m, 11.10 - 0m) and a red cross symbol, indicating its use as a technical drawing for construction or planning purposes.
